

## 4<sup>th</sup> International Sarcoma Nurse and Allied Professionals Meeting

“Collaboration in Sarcoma Care-Realizing Better Outcomes”

November 15, 2018

### **Report**

The 4<sup>th</sup> International Sarcoma Nurse and Allied Professionals Meeting was a success. We had a variety of speakers from various institutions and disciplines, including Physical Therapists, Physician Assistant, Bedside Sarcoma Nurses, and Oncologists.

Our audience included varied individuals within the Sarcoma Multidisciplinary Team including Physical Therapists, PhD Researchers, Research Nurses, Bedside Nurses, and Nurse Practitioners among others.

We had a total of 35 participants in our meeting.

Several of the participants learned of the meeting via the CTOS website. Other learned of the meeting via word of mouth/e-mail.

Of note, one of the presentations given by a bedside nurse detailed a project she worked on and implemented in her home hospital. The project came about as a result of the collaboration that resulted from Networking at the iSNAP meeting in previous years.

At the end of our one day iSNAP Conference we held a business meeting to discuss plans for 2019 and beyond. All of the participants who stayed for the business meeting were very enthusiastic about the future of iSNAP with CTOS.

We thank you for the opportunity to work in conjunction with you and for your support of the nurses and allied health professionals, who alongside the physician group work to care for our Sarcoma patient population.
